

C:/Work/doxicode/mycomplex.h

```
graph BT; A[C:/Work/doxicode/mycomplex.cpp] --> B[C:/Work/doxicode/mycomplex.h]; C[C:/Work/doxicode/testcmp.cpp] --> B;
```

The diagram illustrates a dependency structure where two source files, `mycomplex.cpp` and `testcmp.cpp`, both depend on the header file `mycomplex.h`. The header file is positioned at the top in a gray box, while the source files are at the bottom in white boxes. Blue arrows point from each source file to the header file.
